(54) Title: TICK REMOVER

(57) Abstract: A tool (1) for removing ticks and the like parasites from the skin, said tool having an engagement part (2) with a bottom face (12) and a top face (14). A V-shaped groove (4) is provided that has side faces (11) between the bottom face and the top face at an edge (5) of the engagement part (2). The side faces (11) converge towards each other from an outer opening at the edge (5) to an inner assembly point (6), wherein the V-shaped groove (4) is wider at the top face (14) of the engagement part (2) than at the bottom side (12). An essential part of each side face (11) of the V-shaped groove (4) between the bottom face (12) and the top face (14) of the engagement part (2) is constituted of a concave engagement face (13).
